RE: CASE NUMBER 05-1740-E-CS
LIBERTY GAP WIND FORCE, LLC

Application for a Certificate of Convenience and Necessity Authorizing the Construction and Operation of a Wholesale Electric Generating Facility and Related Transmission Support Line of less than 200 kV and Associated Interconnection Facilities in Pendleton County, West Virginia

PLEASE BE ADVISED that as property owners in Pendleton County, West Virginia, we remain staunchly opposed to this outrageous, destructive and totally unnecessary project. We continue to urge the Commission to reject the above-referenced application for industrial windmalls and electrical transmission facilities on our pristine mountain ridges.

This ill-conceived project is repleat with devastating implications for the State's tourism and its scenic mountain beauty, while it's questionable, advertised, potential benefits are so minimal as to be laughble by any reasonable comparison. It is being driven forward exclusively by corporate and personal greed.

Please do NOT approve this application under any circumstance. It is probably the most clearly anti-public project which has come before the Commission in it's history. Its utter rejection at every stage, from concept to construction, should be every West Virginia citizen's highest priority.

Sincerely,

Steven Mohrbacher
Franklin, WV and Naples, FL
