RE: Case 05- 1740 Liberty Gap Wind Farce turbine joke

It seems as if Mr DePoy has struck again. He has sent a PR postcard from a garment manufacturer as if it had real value or significance. He should TRY to do some basic research.

Cabin Creek, the company that sent the postcard, makes garments. Two garments that I have seen indicated they were made in Sri Lanka. Wonder how many turbines the plants in Sri Lanka use, if any. I also wonder if Cabin Creek has ANY plants in the United States of America. If not, how many plants in foreign countries use electricity from turbines? Can Mr. DePoy let us know.

In fact, perhaps he could let us know how many Cabin Creek plants and retail outlets world wide use electricity from turbines. Could he try? Until then, I suggest you IGNORE his postcard
