RE: Case #05-1740

05-1740

Dear Ms Squire:

We have a situation here in Pendleton County on Jack Mountain that will be catastrophe to the future health and continued wild beauty of the County.

As you are well aware the Pendleton County Commissioners conspired with Liberty Gap Windforce, LLC, without the knowledge of its citizens, to erect non-efficient, destructive wind turbines on Jack Mountain. These wind turbines will not only destroy the natural beauty of our county, but will become a burden on the tax payers who will not receive any benefit from the small amount of electricity generated by this inefficient source of electrical power.

This action was done in total secret by the County Commissioners and is being rammed down the throats of the citizens of the county. There has been vigorous protest from the citizens since this clandestine venture was revealed, yet the elected representation of the County continue to bull forward with their involvement.

I am not opposed to modernization within the County as long as our natural beauty and only real asset is considered. It has not been so since 2004. Not only are the citizens trampled with this wind turbine farm but now the Assessors Office (they offer building permits) has issued a permit to build chicken houses within a dangerous perimeter of continuation of the Town water supply. Sandra may I inquire when the elected official of the County are going to treat the citizens of Pendleton County like intelegent persons.

I beseech you to do whatever you office is capable of doing to squash the wind turbine farm.

Thank you,

Mary R Boyer
